"Children's natural language is not words but play. Soundly conceived toys are the raw stuff which children's imaginations convert into play-dramas, earthy play-novels or soaring play-poetry.

Play is fun but it is more: for the child it is the chief means for coming to terms with his world. It is our job to clear the tracks for the child's eager explorations by providing the material and the encouragement for his play.

Grown-ups have the important responsibility of choosing toys wisely in terms of children's ages and interests and capabilities. But, above all, they should seek toys which in addition to fostering skills will focus creativity and stimulate imagination.

But, whether one seeks simple materials for young children or elaborate equipment for older children, intelligently-planned and well-constructed toys are important. Shoddy materials or inappropriate designs let the child down when they collapse at crucial moments or fail to respond to his purposes. Soundly-conceived toys are, after all, the raw materials with which the child works — for play is his work.

PLAYSKOOL KINDERGARTEN BLOCKS FOR COMPLETE BLOCK EXPERIENCES

A-B-C KINDERGARTEN BLOCKS — Building Blocks are the most important single tool of play for youngsters from the age of 18 months to 9 years. Through the use of blocks a child can recreate the settings he sees in the grown-up world, and no other media combines such a diversified pattern of enjoyment, as well as educational value. Playskool DeLuxe Kindergarten Blocks are made on the approved unit scale (1⅜" by 2¾" by 5½", and multiples thereof). These sets are offered in the finest quality of both hard and soft wood. Hard wood is preferable, of course, and we strongly urge buying the hard wood blocks, as they will withstand years and years of hard play, whether used individually or by groups. Soft wood sets are practical, however, for unsupervised play — where there is only one child — or for limited group play. Soft and hard wood sets are identical in content, dimensions and shapes, except for item A.
